About Cellostopia

Classical resonance meets dystopian decay

Cellostopia for Padshop 2 is the third chapter in an evolving orchestral FX string series, reimagining the cello as a powerful cinematic sound design instrument. Built from deeply sampled articulations and percussive strikes on the cello's top plate, pegs, and bridge, Cellostopia transforms the familiar into something otherworldly — pushing the instrument far beyond the concert stage.

Inside, you'll discover evolving cello pads, re-synthesized comps, chromatic percussion, and an expansive collection of orchestral FX including risers, glissandi, and clusters. These elements are paired with dark cinematic soundscapes and rhythmic suites of string- and cello-based percussion, creating a rich toolkit for tension, motion, and atmosphere.

Balanced between utopian calm and dystopian decay, Cellostopia is equally at home crafting meditative underscores, futuristic ambiences, and apocalyptic cinematic moments. Designed for film scoring, trailers, science fiction, and experimental sound design, this expansion unlocks a world where serenity and collapse coexist — shaped entirely by the voice of the cello.

Features

- 525 new creative presets for Padshop 2
- 345 manipulated stereo samples
- Toolkit for EDM projects, sound designers, film and trailer composers
- All presets designed by Gary Gibbons from Online Music Foundry
- Exclusive expansion for Padshop 2

Compatibility

Cellostopia VST Sound Instrument Set is an expansion pack for Steinberg's Padshop 2, a Granular and Spectral Synthesizer.

* For Non-Padshop 2 users – This product is not compatible with Padshop or Padshop Pro.

Contents included

1. 525 VST Presets (filename: Cellostopia Presets.vstsound)
2. 345 Samples (filename: Cellostopia.vstsound)
3. Installation (filename: Cellostopia_Activation_Installation.pdf)
4. License Agreement (filename: Cellostopia_License_EndUserAgreement.pdf)
5. Patch List (filename: Cellostopia_PatchList.pdf)
6. Readme (filename: Cellostopia_Readme.pdf)

* Available as download only
