## About Granular Bass Guitar

This expansion pack offers 1 Guitar, 12 Synth Comp, 24 Musical FX and 63 Bass presets for Steinberg's Padshop and Padshop Pro VST granular synthesizers. With 126 manipulated samples using various bass amps and effects, this bass guitar and sound designer sound set provides a perfect solution for producing your sound.

Designed by composer and producer, Gary Gibbons, at the World Worm Studios recording facility in Hong Kong, this sound set provides a solid foundation for producing many types of basslines and dark soundscapes by using the Padshop audio engine.

Q: What styles of music can I produce with Granular Bass Guitar?

A: With this expansion pack, you can easily produce country, blues, R&B, pop, rock and metal, as well as gothic rock soundtrack compositions. One of the special features of this expansion pack is the traditional granular synthesis patches that features zombie/horror soundscapes and tempo-synced grunge. It's a perfect solution for horror and industrial rock producers.

Q: Can you describe a bit more about the Synth Comp patches?

A: Sure! Here is an example of one of the Synth Comp patches. As you can see below, the preset called "Split Overdrive Bass Guit" has two layers. Layer (A) is a sample of a bass guitar with an overdriver effect and Layer (B) is a sample of a guitar with distortion. Layer (A) and (B) are split by using the key follow functions so that the user can play basslines and guitar leads with one preset.

Preset Name	Category	Sub Category	Sample A	Sample B
Split Overdrive Bass Guit	Synth Comp	(Synth Comp) Other	overdriver_b_1	guit_a_3

## Features

- 100 new presets produced by composer and producer, Gary Gibbons, at the World Worm Studios recording facility in Hong Kong
