About Spectral Dynamite

This new spectral expansion pack offers 110 patches for Izotope's Iris 2. With 100 manipulated stereo samples, this sound set provides a perfect solution for sound designers and composers of all genres.

Designed by composer, sound designer and producer, Gary Gibbons, at the Professional Music Foundry recording facility in Hong Kong, this sound set demonstrates the power of the Iris spectral audio engine.

Features

● 110 new patches produced by composer and producer, Gary Gibbons

● With 100 manipulated stereo samples, this expansion pack delivers an all-in-one solution.
